contributed articles on economic aspects of agriculture in india

excerpt from handbook of indian agriculture chapter ix fertility and barrenness absolute barrenness impas sible practical means of judging relative fertility absorbent coefficient of soils available plant food acid secretions from rootlets exercising different amounts of solubility the law of minimum specific causes of barrenness about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

this open access book provides an evidence based roadmap for revitalising indian agriculture while ensuring that the growth process is efficient inclusive and sustainable and results in sustained growth of farmers incomes the book instead of looking for global best practices and evaluating them to assess the possibility of replicating these domestically looks inward at the best practices and experiences within indian states to answer questions such as how the agricultural growth process can be speeded up and made more inclusive and financially viable are there any best practices that can be studied and replicated to bring about faster growth in agriculture does the prior hypothesis that rapid agricultural growth can alleviate poverty faster reduce malnutrition and augment farmers incomes stand to answer these questions the book follows four broad threads i linkage between agricultural performance poverty and malnutrition ii analysing the historical growth performance of agricultural sector in selected indian states iii will higher agricultural gdp necessarily result in higher incomes for farmers iv analysing the current agricultural policy environment to evaluate its efficiency and efficacy and consolidate all analysis to create a roadmap these are discussed in 12 chapters which provide a building block for the concluding chapter that presents a roadmap for revitalising indian agriculture while ensuring growth in farmers incomes

this book examines the various issues and concerns faced by indian agriculture under the obligations of wto and the free trade agreements while the issues discussed pertain mainly to india the lessons can also be derived for many other similarly placed developing countries the book delves into various aspects of indian agricultural trade and evaluates the domestic policies and

regulations of government while also looking at external factors like wto free trade agreements and non tariff barriers chapters of this book have been contributed by eminent agricultural economists lawyers and social scientists providing the perspective from their sector this book highlights the challenges and opportunities for agriculture sector under the rapidly growing regional trade agreements and results of negotiations under the wto it also provides critical insights into the ongoing fisheries subsidies negotiations at the wto and issues relating to non tariff measures the findings have broad implications for developing countries in general and india in particular this book will greatly benefit trade negotiators policymakers civil society farmer groups researchers students and academics interested in issues related to the wto ftas tariff and non tariff barriers and other allied issues concerning indian agriculture the techniques used in analytical part will mostly benefit the researchers as they can not only use these techniques and methodologies for their future research but to also carry the research forward the book is useful for many educational institutes which teach international trade agricultural economics and wto and ftas studies

indian agriculture clearly needs change the green revolution s momentum has been lost with stagnation even crisis setting in how will this change come about by thinking of agriculture beyond the wheat rice and cotton tobacco framework from irrigation and fertiliser to innovative farming practices credit and infrastructure to farmer distress marketing and pricing to climate change poultry and rabbit farming to horticulture and floriculture this book provides a fresh construct for agricultural growth

this edited book focus on highlighting the evolution of indian agriculture over the past 75 years of independence covering every sector viz crop science horticulture management of biotic abiotic stress post harvest quality management livestock fisheries mechanization marketing and human resource development the book has 30 chapters from most experienced researchers and academicians who are actively engaged in research work on the subject area of the book the book is in line with the strategy for new india 75 brought out by niti ayog it highlights india s success stories in innovation technology enterprise and efficient management together to achieve overall growth while making available food required nutrition and others ecological services it also asses the india s preparedness in terms of commitment toward sustainable development goal sdg the book is a relevant reading material for both students and researchers and policy makers

agriculture is a major source of rural employment and plays a crucial role in the economic development of india the state of indian agriculture examines the present scenario of indian agriculture and studies the trends at national as well as state level the overall objective of the book is to analyze the impact of climate change on indian agriculture and its implications for food security the book recommends strategies to enhance productivity and the adoption of climate smart practices to promote sustainable agriculture thereby ensuring food security in india it argues that there is an urgent need for a holistic and strategic approach to mitigate the challenges of climate change

authentic and authoritative this presentation shares a comprehensive overview of the extensive research undertaken by the agro economic research centers aercs and the concerns confronting indian agriculture established across the states in india to provide policy feedback to the ministry of agriculture the aercs generated many important research initiatives and debates over five decades this second volume focuses on the problems confronted at the regional level by each of the participating states

the largest portion of india s natural resources consists of land and by far the largest number of its inhabitants is engaged in agriculture therefore in any scheme of the economic development of india agriculture holds a position of basic importance the agricultural sector occupies a key position in the indian economy and provides employment to about 65 per cent of the working population the economic development process guided by the market driven parameters has benefited select sections of society however the fruits of liberalization and globalization have not percolated down to the agricultural and rural sectors sufficiently the farming community is by and large in crisis due to a non protective attitude of the government agriculture has become unviable with liberalized imports global competitiveness and the volatile nature of market prices in spite of recent corrective measures the farming community is in distress and farmers suicides are taking place unabatedly in different parts of the country particularly in southern states this book contains agricultural impact research findings by scholars specializing in different aspects of indian agriculture

agriculture and allied sectors unquestionably are considered to be the largest source of livelihood in india contributing largely to the gdp of the country however despite a significant increase in the production of food grains the agriculture sector has been facing innumerable challenges primarily because of its dependency on natural resources which have shrunk due to increasing demographic and socioeconomic pressures this book a study assigned by the ministry of agriculture studies different facets of

agriculture and allied sectors it provides an overview of indian agriculture and presents an analysis of its performance over the years showcasing the issues faced in the development of agriculture it captures the interventions and initiatives of the government for the development of indian agriculture
