An Introduction to the Study of Embryology *David Boonin Davor Solter Laurie Shrake Enid Gilbert-Barness Belinda Bennett William Fisher Norris Thomas Stephen Cullen Oscar Hertwig Harrison Allen P. Motta Army Medical Library (U.S.)*
Auguste Chauveau Harrison Allen Royal Microscopical Society (Great Britain) Massachusetts State Board of Agriculture Royal Dublin Society Alfred Cort Haddon

david boonin has written the most thorough and detailed case for the moral permissibility of abortion yet published critically examining a wide range of arguments that attempt to prove that every human fetus has a right to life he shows that each of these arguments fails on its own terms he then explains how even if the fetus does have a right to life abortion can still be shown to be morally permissible on the critic of abortion s own terms

recent advances in techniques and understanding in the fields of genetics embryology and reproductive biology have opened up new ways to treat a wide range of medical problems they range from new options for infertility treatment and pre implantation genetic diagnosis to stem cell based therapies for debilitating diseases since all these approaches involve the manipulation of human gametes embryos or embryonic cells and could also permit more contentious uses they have stimulated a controversial debate as to what aims are desirable and to what extent experiments on human embryos are morally permissible if permissible at all the situation is further complicated by the fact that scientific projects are increasingly realized through international co operation and that patients are increasingly ready to seek morally contentious medical treatment wherever it is available and thus to bypass national legislation in view of this situation the europäische akademie

assembled a temporary interdisciplinary project group in which scientists from universities and non university research organizations in europe working on the relevant subjects were brought together and charged with establishing a knowledge base and providing suggestions for long term solutions that would be acceptable for society presented here are the results of this project ranging from a discussion of the theoretical and practical possibilities in human embryo experimentation and its alternatives in research on adult stem cells a comparison of the situations and prospects of regulation of embryo research in europe a survey of european public attitudes and a philosophical analysis of the arguments and argumentative strategies used in the debate

shrage explores the moral premises of a critically self aware and robust feminist sexual politics focusing on the issues of prostitution and abortion to develop an interpretive and pluralist approach to feminist ethics

exhaustively illustrated in color with over 1000 photographs figures histopathology slides and sonographs this uniquely authoritative atlas provides the clinician with a visual guide to diagnosing congenital anomalies both common and rare in every organ system in the human fetus it covers the full range of embryo and fetal pathology from point of death autopsy and ultrasound through specific syndromes intrauterine problems organ and system defects to multiple births and conjoined twins gross pathologic findings are correlated with sonographic features in order that the reader may confirm visually the diagnosis of congenital abnormalities for all organ systems obstetricians perinatologists neonatologists geneticists anatomic pathologists and all practitioners of maternal fetal medicine will find this atlas an invaluable resource

within contemporary society the themes of globalization health and regulation interlock in complex patterns changing in response to the mix of cultural differences regulatory preferences and available resources to turn the kaleidoscope and to change the mix is to change the pattern this book is about those patterns as they arise in the contemporary legal health and ethical context exploring the transformations and challenges brought by technological change and the regulatory options in the contemporary global village

this work contains the first reference to what would become known as cullern s sign discoloration of the skin about the umbilicus as a sign of ruptured ectopic gestation extraordinary illustrations by max brodel including a series of truly remarkable variations in belly buttons are also included

innovative microscopic techniques introduced during the last two decades have contributed much to creating a new picture of the dynamic architecture of the cell which can now be more exactly correlated with specific biochemical and physiopathological events these developments have led to significant advances in our understanding of the physiomorphological and pathological aspects of the secretory mechanism as well as the pharmacologic methods used to control experimentally the function of exocrine and endocrine glands the integration of new ultrastructural methods such as freeze fracture etching immunocytochemistry scanning and high voltage electron microscopy cytoautoradiography etc has proven to be of great value when applied to the study of endocrine cells and tissues because information on this topic has appeared in a variety of scientific and medical journals this book 1 reviews the results of an integrative approach presenting a comprehensive ultrastructural account of the main aspects of the field 2 points out gaps or controversial topics in our knowledge and 3 outlines pertinent directions for future research the chapters prepared by recognized authorities in the field present traditional information on the topic in a concise manner and with a valuable selection of original illustrations show what the integration of new microscopic methods can contribute to the subject in terms of new concepts this volume will be useful to cell biologists anatomists embryologists histologists pharmacologists pathologists and of course endocrinologists it will also be of interest to students practitioners of medicine and to all others dealing with clinical research and diagnosis
